Welcome to the latest edition of the Office Fox AV Guide. Since the start of the pandemic, AV technology has been a vital part of our day-to-day life. The industry has been defined by technological advancements which has helped many businesses and educational settings to overcome the barriers of working or studying remotely. Many companies, schools, and educational institutions have learnt the benefits of remote working and are making the move towards hybrid working and blended learning.

Even during these tough times, we continue to build partnerships and introduce new brands to our portfolio which address societal and market shifts. Aver offer a professional range of meeting room and remote working solutions which are very impressive.

This latest AV guide supports many businesses reopening their doors again and the technology needed to help them to regain their standing in their respectable industries. The retail sector is currently in the spotlight, as many shops and small businesses continue to fight for their place on the high street by investing in new technologies, including digital signage, interactive displays, VR, AR and AI.

The live events market is starting to open up and we are excited to share the news that our 50,000 square foot experience centre, Innovation House, is now **officially open!** It is home to technology from across the Midwich UK & Ireland Group companies. We have 12 different application-led areas that showcase the latest AV solutions from 50 leading brands. Innovation House offers real life demonstrations that must be experienced, making it the go-to destination for everything AV.

**I hope you enjoy our latest AV guide.**

## Introducing Large Format Displays

With many sectors trying to recoup the losses of 2020, it has never been more important for businesses to put their products and services in front of as large an audience as possible. For many, this involves utilising Large Format Displays (LFD). With high brightness, vibrant colour and a single viewing area unblemished by cross-hatching, these dazzling displays light up everything from classrooms to city centres. Bringing a brand to hundreds with a single presentation.

LFDs have become a part of everyday life. From presenting achievements in a corporate waiting area, to adding glamour to a flagship retail store, these displays never fail to impress. Increasingly, they're found in educational spaces too - supporting screen-sharing and whiteboarding in schools and training rooms, whilst engaging visitors in museums. LFDs play a crucial role in keeping everyone safe by providing vital information in command and control centres across the country.

Digital signage continues to be the most widespread use of LFDs, with built-in media players, integrated speakers and audio amplifiers producing playback capability straight out of the box. High-end models can operate around the clock, promising businesses years of trouble-free service. This makes them the ideal display solution for even the most demanding environments, whilst IoT SoC (internet of things system-on-chip) enables a whole estate of screens to be managed, updated and kept secure from a single remote location.

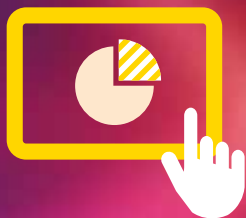

The popularity of large format displays is on the rise. We are seeing corporate, education and retail environments utilising video walls, digital signage and interactive displays, while reaping the benefits of better engagement and productivity.

# Clear View with Non-glare Coating

<http://www.lg.com/uk/business>

To find out more about the benefits of LG displays call your Account Manager today.

## LG 65" 65UH5F-H Display

Viewers can be annoyed by unnecessary reflections when watching a screen under brightly lit conditions. The UH5F-H series has resolved such inconveniences by increasing the level of haze, which enhances visibility and text readability. With the resolution that is 4 times higher than FHD, it makes the colour and details of the contents more vivid and realistic.

65" Display

Vivid colours with Ultra HD Resolution and Non-glare Coating

Narrow Bezel and Slim Depth

Detachable Logo and Built-in Speaker

LG webOS Smart Signage Platform

As a leading supplier of electronics technology, LG excels in offering comprehensive and indispensable solutions to suit your needs. With their expertise and R&D in the digital signage industry, LG prides itself in providing some of the most advanced and flexible products and technologies.

## THE SHARP/NEC DIFFERENCE

Delivering perfect-fit solutions from the World's widest display portfolio is not the only reason why Sharp/NEC is not like other display vendors:

**1** Industry leading reputation for quality and reliability

**2** Pioneering innovation addressing genuine customer need

**3** Unrivalled service and support infrastructure

**4** Specialist expertise across all vertical sectors

**5** Dedicated customer support program for global enterprises

**6** Committed to supporting a climate-neutral future

# SHARP / NEC

Designed to be robust and reliable, NEC displays are built to last. From 24/7 backlit displays to entry-level screens, NEC has a broad range of large format displays that are sure to meet your customer's needs.

## The interactive display manufacturer you can rely on...

During times of change and uncertainty, Promethean is the interactive display manufacturer you can rely on. For us, being the market leader\* is about much more than the numbers... it's about honesty, transparency and delivering service and support when it's needed. And we consistently prove this:

### Expanded demonstration programme

Giving schools flexibility and choice with virtual, remote and on-site solutions.

### Maintained product development

ActivPanel updates released to schedule over the past six months.

### Sustained operations

We've stayed fully open for business during lockdown and supported our partners.

### Continued investment

We never stand still. We invest in our products and services to drive forward innovation.

**ActivPanel  
Elements Series  
available in  
65", 70", 75"  
& 86"**

## Designed by teachers. Developed by Promethean. Loved by education.

Drawing on over 20 years' experience developing edtech solutions that enhance teaching and learning, Promethean has designed the ActivPanel Elements Series mindful of the little things that make a big difference to teaching day to day.

### Apps at your fingertips

The powerful in-built Android 8 device provides access to a wealth of pre-loaded apps, made even easier and quicker through the new Promethean Locker.

### Learning in the moment

The instant Whiteboard app provides teachers with an infinite canvas to deliver interactive and engaging lessons.

### Natural writing experience

Promethean has developed its own technology making writing on the ActivPanel as seamless as putting pen to paper.

### Intuitive and ergonomic

The ActivPanel Elements Series delivers a quick and easy to navigate user experience, saving valuable teaching time.

### Award-winning software

Deliver interactive lessons using Promethean education software - choose from ActivInspire or cloud-based lesson-delivery software ClassFlow.

**Promethean®**

Perfect for education, corporate and retail environments, iiyama's touchscreen range is easy to use and ready to plug and play. Available in sizes ranging from 32"- 98", with either PCAP or Infrared multi-touch technology, these interactive displays are professional, solid and robust.

## Introducing UC&C

**29.2%**

market growth over a year of 2020<sup>1</sup>

**\$47.2bn**

global revenue over the full year of 2020<sup>1</sup>

**10**  
INTO **1**

**10 or more**

functions included within one UC&C interface

The term “unified communications and collaborations” or UC&C solidified its relevance last year when majority of businesses moved to remote working. The market continues to grow with companies defining their UC&C strategies while also transitioning into hybrid working.

Zoom and Microsoft Teams have become household names as the most popular UC&C platforms. UC&C provides the tools to integrate multiple communication sources so they can be managed all in one entity instead of separately. This enables businesses to create the ‘virtual Swiss army knife’ of work environments with one platform hosting the ability to complete all essential tasks such calls, emails, voicemail, conferencing, organisation, instant messaging, whiteboarding and filesharing.

Having one central tool is quicker to learn and easier to use. It facilitates simpler collaboration and the sharing of ideas. It makes people easier to get hold of and information more accessible, meaning the whole process become more efficient and effective. Overall, having a central source of resources boosts productivity, improves moral and increases customer satisfaction.

Forward-looking organisations have been reaping the benefits of UC&C for years, however the boom in homeworking led to it taking off like a rocket. This year, many companies will be looking at ways to minimise disruptions while transitioning into hybrid working, adopting the new working models, at the same time focusing on communication and collaboration. The change is being facilitated by UC&C technology, providing products that can offer a single companywide solution.

# Unified Communication & Collaboration

**BARCO**

## Barco Clickshare Present range

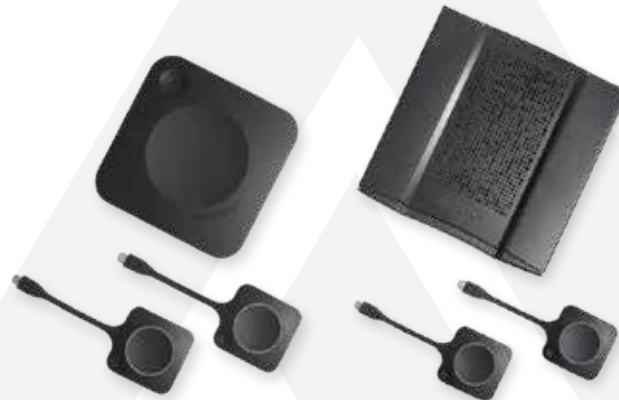

**BARC5**

**BARC10**

Wireless presentation with ClickShare Present allows for intuitive, easy-to-use presentation and collaboration in a fixed conference room or as a standalone. Our wireless display collaboration platform allows participants to bring their own devices without having to physically link them using cables (HDMI, VGA...) and adapters, providing valuable flexibility in addition to convenience. The connection from laptop to TV, display, projector is wireless. Content sharing can be done with Button, App or screen mirroring (which offers different cast screen solutions like AirPlay, Google Cast or Miracast).

## Barco Clickshare Conference range

**BARCX20**  
**BARCX30**

**BARCX50**

Simple, easy, wireless. That's how ClickShare Conference shares the apps from your laptop on the meeting room display. ClickShare Conference wirelessly connects them to the camera's, speakers and mics in the room for better hybrid meetings. Our range of wireless conferencing solutions is designed to work wirelessly with your existing video conferencing system and a wide range of USB audio-visual peripherals like mics, soundbars and cameras. Without the hassle of physically connecting them to your laptop using cables and adapters. This makes hybrid meetings as intuitive and straightforward as face-to-face meetings

**vaddio**

## IntelliSHOT ePTZ Camera (Black)

VAD99921100001

The IntelliSHOT® professional camera makes video collaboration and streaming classes easy and effortless. Equipped with advanced IntelliFrame™ technology, the IntelliSHOT ePTZ camera is the only auto-framing device that can be adjusted based on the room conditions and user's preferences.

# Audio Conferencing

## biamp.

### The complete audio solution

#### BIAUKMRBCW

This bundle provides a complete audio solution for meetings of up to 11 people, including everything required to outfit a conference room to enable clear communication in every meeting. Incorporating Beamtracking® technology, the award-winning Parlé microphones latch onto the voices of meeting participants, allowing them to move freely around the space while remaining easily heard and understood.

### Bringing quality sound to your web based conference

#### Devio SCR-25

Intended for huddle rooms or small conference rooms, the SCR-25 uses Beamtracking™ microphones and professional grade DSP to optimize the audio quality, allowing far-end conference participants to experience the conversation naturally.

## SHURE®

### An elegant approach to conferencing audio

#### SHUMXA910W60C

The MXA910 eliminates all equipment clutter, leaving more room for clarity. With Steerable Coverage™ and onboard IntelliMix digital signal processing, you can capture every voice. Patent-pending Autofocus™ technology fine-tunes the audio pickup in real time, for consistent sound even if participants lean back or stand up.

### Ensure speech is captured accurately and reproduced intelligibly

#### SHUMXA310B

Organisational clarity takes focused discussion. But how can you conference effectively, if you can't be heard clearly on the call? The MXA310 maximises audio quality, so voice comes through clean — making purpose clear. With Steerable Coverage™ and a low profile design, it removes unnecessary clutter, giving you even more clarity.

### Designed for high-quality audio capture in premium AV conferencing environments

#### SHUMXA710W2FT

The MXA710 Linear Array Microphone represents the next evolution in Shure array microphone technology. The sleek, linear form factor of the MXA710 allows for placement virtually anywhere in a meeting space. Available in two lengths and three colours, the MXA710 includes proprietary Shure IntelliMix® DSP and Autofocus™ technology that provides all the processing needed for echo and noise-free conference audio.

### The IntelliMix P300 makes sound smarter, faster

#### SHUP300IMX

Don't let echo, noise or distortion take over the meeting. The IntelliMix® P300 enhances every aspect of conference audio. Combined with Microflex® Advance™ or Microflex® Wireless microphones, clean, clear sound reproduction and intelligent mixing keeps the agenda on track with clear communication.

# AVer Voice Tracking Functionality

**AVer, in partnership with Shure, has created a flexible solution offering voice tracking function:**

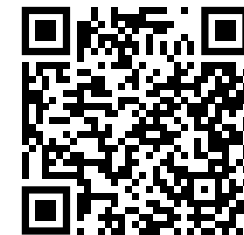

Available on all AVer Pro AV auto tracking and PTZ series cameras.

In combination with Shure® Microflex® Advance™ microphones including the MXA910, MXA710, MXA310 and IntelliMix® P300 Digital Signal Processor.

Easy set-up and control with AVer PTZ Link Software.

# Video Conferencing

## ≡ Huddly

### AI Collaboration Camera for Large Meeting Rooms

#### HUDDL1

Huddly L1 is a collaboration camera that delivers smart user experiences in large and medium meeting rooms. Designed to make video meetings inclusive and productive for the whole team, it provides instant, responsive framing and Full-HD video of everyone in the room. Huddly L1 is compact and unobtrusive, with no moving mechanical parts.

### Compact 4K camera perfect for remote work

#### AVERCAM130

Take your meeting anywhere with this compact, 4K conference camera with dynamic professional lighting. The CAM130 packs a full suite of features into a simple, portable device. Perfect for traveling and remote team members.

### Professional PTZ Camera - Black

#### AVERPTZ310

AVer PTZ310 is available in white or grey and equipped versatile functions to suite every classroom, hospital, or business. Creating the superior video quality, the PTZ310 makes you feel the action in a scene!

### Distance Learning Tracking Camera

#### AVERDL30

When distance learning and hybrid classrooms are the new normal, the AVer DL30 is a must-have solution for online education. With the DL30 connected to a laptop, you can present freely onstage while livestreaming so students can learn no matter where they are. Teachers don't need to be camera shy anymore—they can just be themselves and teach how they want thanks to the DL30 tracking camera!

### 4K Video Bar with Intelligent Lighting for Huddle Room

#### AVERVB130

The All-in-One VB130 is equipped with the latest Intelligent Lighting so you can appear energetic and professional in any environment. Also, AVer's audio fence, beamforming technology, and audio tracking precisely pick up voices. There's even auto framing to fit every participant onscreen in seconds. Activate a brighter and better video conferencing experience with the VB130.

# Room Booking

ROOMZ  
INTELLIGENT OFFICES

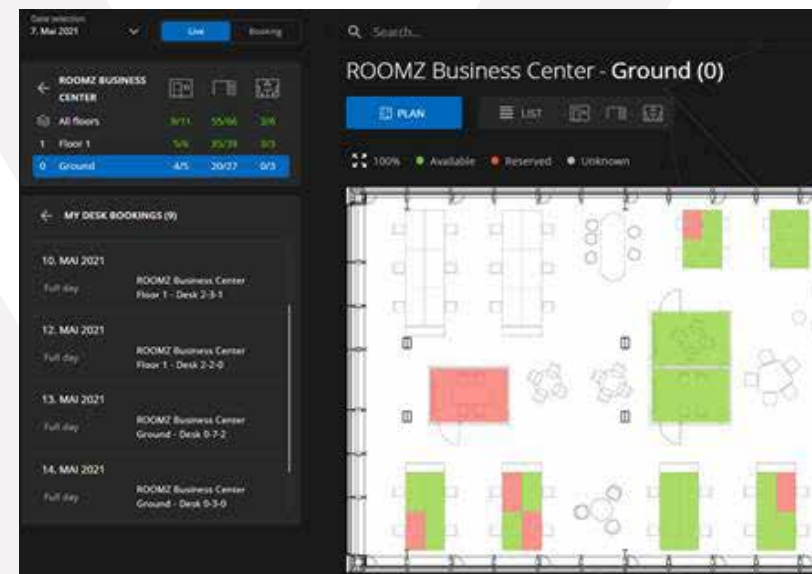

## ROOMZ Display SILVER including software subscription

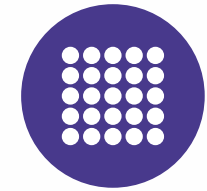

### ROOMZSILVER1YR

Provides the right information at the right time, right where it's needed. Puts an end to guesswork in corridors and lets employees book available spaces right on the spot. ROOMZ Displays are easy to install within minutes and connects using your existing Wi-Fi network. This product includes Software Subscription (1 Year "ROOM BASIC").

## myROOMZ - Web Application

- Single Sign-on login (SSO) for all employees
- Very easy-to-use
- Flightboard or Floorplan views
- Find and book available spaces
- Find people

## Introducing High End Displays

Video walls allow you to explore the physical spaces with creative and engaging content, presented on the big scale. Built from a customer-designed tiles or panels, video walls can be almost any size or shape - from a 2x2 panel display in a reception area to the entire façade of a building, the ribbon around a sports pitch, or inside of a dome. When it comes to exploring the possibilities of video walls, you are only limited by your imagination!

The most used LCD technology provides superb viewing experience for an affordable price. The technology is further advancing, minimizing the chequerboard effect by narrowing the tile border or “bezel” to create a truly seamless content sharing.

Newer LED technology is already the top choice for outdoor use, thanks to its unmatched brightness and vibrancy of colour. The hype around sub 3mm, Narrow Pixel Pitch (NPP) LED isn't going anywhere, as the feature set truly delivers in such a wide variety of applications without compromise. Under the NPP umbrella sits a range of products with a broad selection of features, making it suitable for numerous verticals including retail, corporate, education, command & control and rental.

Spreading images across multiple tiles makes video walls more complex than single panel displays. Basic processing can be performed within the wall itself. However, a separate controller provides a more sophisticated set-up, combining input from multiple sources and dividing the wall into different areas. It introduces simplicity in complex content sharing arrangements and easy management.

All specifications are subject to change

## New 30,000 lumens laser projector

The EB-L30000U Pro AV installation projector has been developed for vivid theatrical and film projections, or areas with high ambient light, such as shopping centres and galleries.

EB-L30000U

## Epson's native 4K laser projector

The EB-L12000Q offers an incredible resolution and a host of features that hugely benefit the rental and installation sector, such as backwards lens compatibility and swappable interface boards.

EB-L12000Q

# Video Processing

## Aetria

### Control rooms made simple

Aetria is Datapath's integrated solution for the design, management, and operation of control rooms of any size.

It has been developed for the most challenging and complex applications, where solutions need to balance the increasing quantities of sources, content, and data, whilst maintaining total reliability and usability for the operator.

## Multi-display controllers

### DATAPFX4HDR

The Datapath Fx4-HDR builds on the success of its award winning Fx4 and x4 predecessors and brings the superb HDR 10-bit colour clarity, 4K60 resolution as well as audio support into the mix.

## Videowall controllers - VSN series

### DATVSNMICRO600R

### DATAVSN1172R32

Suitable for a variety of different areas such as traffic control centres, telecom operations facilities, utility companies, security applications and in entertainment settings, the Datapath VSN series are capable of integrating many types of video and data sources onto any display configuration. Highly expandable and flexible, the VSN series uses Datapath's latest generation of video capture and graphics cards and is 4K60 4.4.4 capable.

## Tierra+, pushing the boundaries of your creativity

Real-time media manipulation, playback and mapping solutions. Hippotizer's award-winning range, Now in its fourth generation provides real-time video playback, manipulation and projection mapping for the live events and AV industries. Hippotizer™ is one of the leading players in the ever growing field of scenic video.

# Image Processing

BARCO

## E2 Gen2 image processing control

### E2

Raising the bar for screen management, the E2 presentation systems provide superior image quality, exceptional input and output density, great expandability and durability. Supporting native 4K input and output, it is a truly versatile system. Multiple E2s can be linked together to process extremely large pixel canvases supporting the largest displays available.

NOVA STAR

## The unrivalled 4K all-in-one controller

### NovaPro UHD Jr

NovaPro UHD Jr is NovaStar's latest video controller, combining 4K processing and 4K sending into a simple all-in-one wonder of technology. With unrivalled processing abilities and excellent loading capacity, the Novapro UHD Jr brings an amazing viewing experience.

tvONE

## CORIOmaster2

The brand new CORIOmaster2 has been designed from the ground up to give massive performance gains and is the most powerful video processor available on the market for 4K & 8K environments. A truly massive video design canvas allows for unbridled creativity with more 4K60 windows than you ever imagined.

## CORIOview

CORIOview is the fastest, most intuitive 4K multi-window processor with up to 8 sources. This easy to use, plug and play solution features front panel control for preset recall or source selection. With six product variants CORIOview can take in almost any input type and display it on a HDMI display up to 4K.

## Introducing Projection

**8%**  
global projector market  
CAGR, 2021-25<sup>1</sup>

**20,000**  
hours maintenance-free  
with laser projectors

**\$5.88bn**  
estimated revenue  
growth by 2025<sup>2</sup>

The widespread appeal for projectors has gone beyond the classroom and boardrooms and into living rooms, hospitality and further... While end-users demand Full HD and 4K models, the key market driver has in fact been the introduction of projectors that are laser light sourced. This new technology allows not only enhanced image capabilities and a longer product life, but it is also more cost effective and environmentally friendly than ever before.

Projectors excel at creating large images in a flexible and cost-effective manner. Various technological advancements such as product integration with cloud computing, the internet of things (IoT) and artificial intelligence (AI) are contributing to the market growth. Improvements in sensor technologies and the implementation of digital learning solutions, along with increasing automation and digitization across the education sector, are expected to drive the market even further.

All our brands now provide laser options for their projections. Boasting a longer life, sharper image and higher brightness, laser projectors are a more environmentally friendly alternative to the standard lamp projector. With a rated life of five years, or 20,000 hours, these units can be installed once and then forgotten, reducing support costs and the environmental impact of mercury-based lamps.

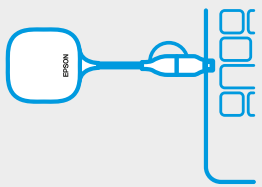

At the top end, a projector's 30,000 lumens of light can compete with most ambient light levels. Projectors of all sizes are also becoming brighter in another sense - with smart features such as true PC-less presentation and wireless connectivity that puts them on par with flat panels, for a fraction of the price.

### Bright, high-quality images

The MZ670 series combines outstanding Solid Shine laser with 3LCD technology to produce vivid, crisp images.

PANPTMZ670EJ

### Designed for performance and clarity

Twelve internal microphone capsules, divided into four quadrants, ensure 360° of perfect speech intelligibility within a 25-ft radius.

MXLAC360ZV2

Offering a broad range of projectors, Panasonic has the perfect solution for your customer. From high-bright, high-resolution projectors for large venues, to video projectors for small spaces, Panasonic projectors can be used in a wide range of environments.

### Vivid images in bright environments

SOLID SHINE Laser phosphor drive with advanced LCD optical engine projects bright, vivid, and detailed images regardless of artificial light levels in the room.

PANPTVMZ50EJ

Pairs well with...

### Peerless' PRG Precision Gear Projector Mount

peerless-AV PEERPRGUNVW

## Colour performance paired with long-term reliability

Built with BlueCore Laser technology, the BenQ LH720 Corporate Laser Projector delivers 1080p images and high-colour performance.

BENQLH720

Pair with a projector screen on page 60

Producing award-winning digital light processing (DLP) projectors, BenQ is Europe's leading 1080p manufacturer. With filter-free long-life SmartEco™ technology and a great range of add-ons, including pen touch, finger touch and multiple screen interactivity – backed with up to five years' warranty – all angles are covered. T&Cs apply.

### Superior conference room projector with 6000 lumens

Leveraging BlueCore laser technology and the WUXGA high resolution, BenQ's LU785 conference projector is designed for the modern corporates.

BENQLU785

**Engineered for enhanced reliability**

### Project high-resolution images and presentations in nearly any environment

The virtually zero-deviation alignment of the BlueCore laser diodes helps boost luminous flux into the light tunnel to produce up to 4000 lumens of brightness.

## NEC education exclusive extended warranties

### Free 5 year extended warranty

Extend your standard 3 year warranty to 5 years or 10,000 hours (whichever comes first). Simply register within 6 weeks of purchase to be eligible for this offer.

Terms & conditions apply. Contact your account manager for more information.

### Extended lamp guarantee

Take advantage of NEC's extended lamp guarantee for educational establishments. Available for selected models, registration extends the lamp guarantee period from its standard 6 months to 3 years.

Terms & conditions apply. Contact your account manager for more information.

Engage your audience with versatile, energy-efficient projectors by Sony for schools, colleges and universities. With portable, install and high-bright projectors that deliver a high-quality image for all sizes of venue, Sony has a broad range of options to choose from. Sony's long-life lamps and smart energy-saving features drive down operating costs while also reducing environmental impact.

## Introducing Small Format Displays

It's said that great things come in small packages, and it's certainly true for Small Format Displays (SFD). Once confined to the desktop, SFDs have now infiltrated every walk of life. From the supermarket shelves to the corporate reception, they are everywhere displaying messages, delivering useful information and providing engaging retail experiences.

The gap between small format and large format displays is rapidly closing. With our largest small format display measuring 55", ultra-wide displays are increasingly more accessible. Bigger doesn't always means better though, as we have to be conscious about the application and space SFDs are being used in. Even in smaller sizes, the most common displays size being 24", SFDs can benefit from all the features of their larger counterparts.

Users' expectations have grown, pushing the innovation and technological advancements. More and more models feature built-in USB-C ports that allow users to meet all their data, video, audio, power and USB needs without extra docking station cluttering up their desk.

Available aspect ratios range from standard 16:9 and 16:10 to ultra-wide 21:9 for users who need to display several data sets side by side. The latest low blue light technologies help guard against eye fatigue without compromising on colour performance. While features such as built-in stereo speakers, HDMI, DVI and DisplayPort connectivity help to achieve more and increase productivity.

## PowerSensor saves up to 70% energy costs

PowerSensor is a built-in 'people sensor' that automatically reduces monitor brightness when the user steps away from the desk, cutting energy costs by up to 70 percent and prolonging monitor life.

PHI242B1

## Ergonomic and space saving

This dual screen monitor arm comes with a wide range of benefits from quality and strength to space saving and health advantages.

CMSDUALBLACK

Whether your customers are creative studios or small businesses looking for a great value monitor, Philips will have a solution. With power-saving features that lower the cost of ownership, alongside ergonomic features that allow for increased comfort, convenience and productivity, your customers will quickly see the benefit of a Philips screen.

# Multi-tasking Monitors

## LG UltraWide™ Monitor

With a range of small format displays ranging from desktop monitors suitable for office use to 21:9 ratio ultra-wide monitors, LG has a display for every occasion. And with in-plane switching for most of the range, great colours and low-energy performance is guaranteed. Plus, with functions like reader-mode and flicker-safe mode, your customers can minimise eye-strain when monitors are being used for long periods of time.

## Introducing Commercial & Consumer TVs

As technology becomes cheaper and quality continues to improve exponentially, large screen Consumer TVs are more popular than ever. We are seeing the shift to go bigger, better, smarter and TV brands are delivering.

It's undeniable how much impact TVs have on our day-to-day life. From adding value to a luxury hotel room to making hospital patients feel more comfortable, TVs play a vital role in our lives and the technology must reflect this. Now, when checking into a hotel room, it's not uncommon to encounter a 55in TV with UHD upscaling and 4K resolution.

Equally impressive is the High Dynamic Range (HDR), which enables the screen to display much more finely graded colours and more striking contrasts between light and dark. Giving the image an overall 'realer' impression. OLED TVs are also growing in sales, wowing customers with their slender form and the ability to create inky blanks by turning off pixels completely. Alternatively, quantum dot LED (QLED) uses nanotechnology to deliver better contrasts and more controllable accurate colours.

Smart TVs have revolutionised the home entertainment with pre-downloaded streaming apps, voice control and easy overall connectivity around your home. It has never been easier to juggle your phone, laptop and TV at the same time, minimising the need for cables and adapters.

Smart TVs now account for almost three-quarters of TV sales as our televisions turn into entertainment hubs that can access the wider internet. In addition to internet access, you can now expect TVs to include the latest AI processing which allows TVs to clean up grainy old movies and TV recordings.

**29.2%**  
estimated QLED market  
CAGR, 2021-27<sup>1</sup>

**33mm**  
pixels in an 8K  
screen

**\$195.45bn**

# LG G Series OLED

## Giving you 100 million reasons to love OLED

LG OLED is the pinnacle of TV experience. Self-lit pixels have evolved to allow even more spectacular picture quality and a whole host of design possibilities, while the latest cutting-edge technologies help deliver unprecedented levels of wonder.

Available in 55", 65" and 77"

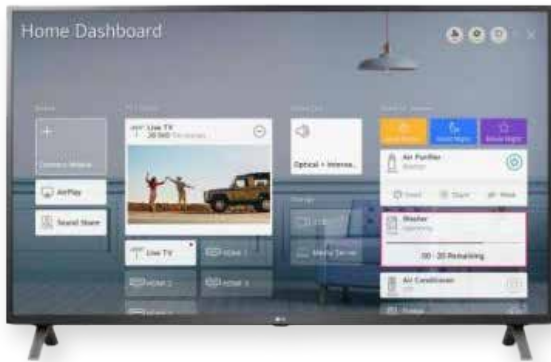

# Consumer TVs

LG makes it easy to find the right LG Television that suits you and brings elegance to your home. Browse through the TVs or ask your account manager for more information today.

## Enhance everything you watch

The processor removes video Noise and creates more vibrant colour and contrast. Low resolution images are upscaled and reproduced at close to 4K quality.

LGLED55UN73006

## Designed for large sized screens

The BT8442 supports weights up to 80kg and features a low-profile design that mounts screens just 30mm from the wall.

# Introducing AV Solutions

In the professional AV world, the current focus is on AV-over-IP or AVoIP. This technology is a logical next step for the industry, reshaping the future of control and system management. The AVoIP is no longer a topic of discussion in the professional AV space but is being integrated in a wide spectrum of sectors and businesses. It is very important to implement and invest in the right AV technology for long-term success.

AVoIP provides a cost-effective solution, relying on inexpensive, commodity components. It's both flexible and scalable, replacing dedicated point-to-point connections with the ability to connect any networkable devices, move them around and add more as needed.

Digital signage has only increased in appeal with the advent of widespread health information about the pandemic and social distancing instructions. As retail and hospitality venues try and recoup their losses from 2020, expect to see even more AV solutions in these locations as a cost-effective way to engage with customers.

Room-booking technology continues to be popular as staff adopt hybrid working styles in their return to the office. Organisations, striving to minimise unnecessary contact between staff, utilise room-booking technology linked to entry systems and occupancy sensors. It provides data on room availability and usage, and can even fire up AV equipment in advance so meetings can start on time.

Supporting these solutions, control systems are seeing strong growth. They allow an entire AV estate to be controlled and managed via a single customisable interface, enabling remote and rapid deployment on a large scale.

**10%**  
global control systems CAGR, 2020-25<sup>1</sup>

**\$38.2bn**

# AV over IP

Unparalleled quality and performance for AVoIP

ZEEZ4KDECC3U/ZEEZ4KENCC3U

When picture quality and latency matter there is no alternative to the ZyPer4K encoder and decoder product line. Delivering uncompressed 4K at virtually zero latency, the ZyPer4K is the first SDVoE solution on the market — enabling the distribution of content to an unlimited number of displays over a 10Gb Ethernet switch. Using industry standard CAT 6a cables, or fiber, you can send audio and video from HDMI, SDI, Analog and DisplayPort source up to 100 meters - and using the USB port, control keyboards, mice, and cameras directly over your network. ZyPer4K also has a 1Gb direct network connection, ideal connecting other IP devices - without extra cabling. By using standard networking cables and switches, a ZyPer4K solution can save up to 40% compared to the cost of conventional, proprietary AV switches - without sacrificing image quality, resolution and latency.

# NETGEAR®

8 ports PoE+ for multi-switch audio or single-switch video deployments.

NGGSM4212P100EU

Switching engineered for 1G AV over IP with PoE+, Ultra90 PoE++ and rear-facing ports ensuring a clean integration in AV racks. M4250 switches come pre-configured for standard audio and video signals. When requirements are more specific, an AV user interface offers customization with port-based profiles. For audio Dante, Q-SYS and AES67 profiles are available, as well as an AVB profile requiring an AVB license sold separately. For video the M4250 offers profiles for NVX, SVSI, Q-SYS, NDI, Dante etc. as well as audio/video/control mixed profiles. When multiple switches, NETGEAR IGMP Plus™ brings automation for you to just connect them together.

## NETGEAR M4300 Stackable Switch Series

NGGSM4328PA100N

The NETGEAR M4300 Stackable Switch Series delivers L2/L3/L4 and IPv4/IPv6 cost-effective services for mid-enterprise edge with full PoE+ and SMB core deployments with unrivalled ease of use: 10 Gigabit models can seamlessly stack with 1 Gigabit models within the series, enabling spine and leaf line-rate stacking topologies. Non-stop forwarding (NSF) virtual chassis architectures provide advanced High Availability (HA) with hitless failover across the stack. Dual redundant, modular power supplies equipping full width models contribute to business continuity management. Layer 3 feature set includes static, dynamic and policy-based routing – as standard. Perfect for wireless access, unified communications and IP video, the NETGEAR M4300 Switch Series is also ready for the future, with Software-defined Network (SDN) and OpenFlow 1.3 enabled for your network.

# Connectivity

## Ideal for software video conferencing and interactive displays

### ATLOMEPS62

Part of the Omega™ Series of integration products for modern AV communications and collaboration, the OME-PS62 features HDBaseT extension for video up to 4K/60 4:2:0, plus embedded audio, control, Ethernet, and USB over distances up to 330 feet (100 meters).

## Matrix switcher

### ATLOMEMS52WEU

The Atlona AT-OME-MS52W is a 5x2 matrix switcher with USB & wireless link. It provides universal BYOD, Native wireless casting iOS, Android, MAC, Chromebook & Windows compatibility with HDMI, DisplayPort, and USB-C inputs, plus wireless connectivity for mobile devices. HDMI & HDBaseT Outputs.

## ATEN HDMI Matrix switch

### ATENVE8950T & ATENVE8950R

ATEN's Video over IP solution (VE8950-VE8952 POE enabled) delivers visually lossless 1080p/4K AV signals with low latency over long distance via a standard Gigabit network. It is designed to address the challenges that system integrators encounter when implementing AV over IP solutions and provides an effective, easy-to-use with the free Control Mobile App, and economical Digital Signage/Video Wall Solution!

## 10-Input 18G 4K presentation switcher/scaler

### KRAMVP551X

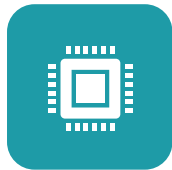

VP-551X is a versatile, professional presentation scaler/switcher for 4K@60 (4:4:4) HDMI, VGA and composite video signals. The unit scales the video and provides options to use the embedded HDMI audio or to select the companion audio channel from one of ten analog audio input signals. After processing and scaling, the embedded AV signal is sent to the HDMI and the HDBaseT outputs simultaneously, and the audio is also sent to a balanced stereo audio output, S/PDIF digital output and a pair of loudspeakers.

# BrightSign® The Most Valuable Player

BrightSign players are built specifically for digital signage with increasing levels of video & HTML performance to deliver quality experiences you can absolutely rely on.

Purpose-built for Signage

Solid State Platform

Patented for Extreme Temps

Energy Efficient

Commercial-grade OS

Cloud-connected

Integrated CMS Partners

Every player includes a free Control Cloud subscription to BSN.cloud for real time player health, remote player controls & your choice of CMS

# Signage & IPTV

## BrightSign®

For a No Compromise, immersive digital signage experience

### LS424

LS424 Entry-Level Media Player with full HD video playback.

### HD224

HD224 Media Player with 4k video playback and mainstream HTML performance.

### HD1024

HD1024 Media Player with 4k video playback and mainstream HTML performance. Expanded IO interactive options via USB 2.0 (type A) and serial ports.

### XD234

XD234 Media Player. True 4K Dolby Vision™ and HDR10+ Playback. Advanced HTML performance.

### XD1034

XD1034 Media Player. True 4K Dolby Vision™ and HDR10+ Playback. Advanced HTML performance. Expanded IO interactive options via USB 2.0 (type A) and serial ports.

### XT244

XT244 Media Player. Enterprise HTML performance, POE, True 4K Dolby Vision™ and dual zone HDR10+ Playback.

### XT1144

XT1144 Media Player. Enterprise HTML performance, POE, True 4K Dolby Vision™ and dual zone HDR10+ Playback. Expanded IO interactive options via HDMI In, USB 2.0 (type A) and serial ports

### Brightlink

1 and 2 way engagement to show content on your mobile device and interact with digital signs safely.

## Network management platform for connecting players to the cloud

Free for all BrightSign players, the innovative BSN.cloud platform delivers cloud-connectivity and provides a total signage solution to meet your unique needs. Securely manage one player or thousands - anytime, anywhere.

# Signage & IPTV

## signagelive

# Signage & IPTV

## Flexible, cost effective and feature-rich

Tripleplay is the world's most innovative and mature single-platform IPTV and Digital Signage solution, delivering professional, secure and quality media content from a wide variety of sources across IP networks to a varied end-point range.

## Deliver video everywhere from anywhere with TRIPLEPLAY CLOUD

Tripleplay Cloud is a next generation Digital Engagement Platform, offering SaaS licensing and a flexible subscription model for IPTV, Digital Signage, Video Streaming and Webcasting.

### Digital Signage

Digital signage CMS software, integrated IPTV, content creator, touchscreen, event triggers, scheduling, playlists

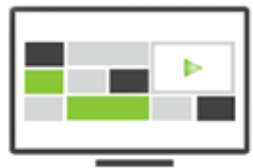

### Enterprise video

Engage your audience through a connected enterprise video platform deployed everywhere

### Hardware

Media players, the Reserva signage displays and the super low latency HD encoder

### Interactive IPTV portal

Interactive hotel TV portal, PMS, BYOD, BYOC, smart TV compatible, apps, info, live news

### Desktop video

PTV, VOD, EPG, personal content library, upload, secure download, commenting, bookmarking

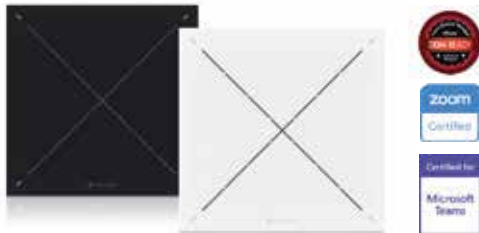

### IPTV

Enterprise IPTV Headend, integrated digital signage, delivery to STB, smart TV, tablet, PC & mobile, full 4K workflow

## Complementing Technology Partners

Being a feature rich software platform, Tripleplay can integrate and complements many other technologies and brands that Office Fox supply.

**TeamConnect Ceiling 2 – feature-rich beamforming ceiling microphone allowing for seamless office integration.**  
 Whether conferencing, collaborating or presenting: Sennheiser ceiling microphone TeamConnect Ceiling 2 makes meetings with remote participants an unprecedented experience. Thanks to the patented, automatic beamforming technology, your messages are transmitted crystal clear from everywhere in the room to remote participants of the meeting or lecture.

Item Number	Model	Description
507488	TeamConnect Ceiling 2 WHITE	A beamforming ceiling array mic with two Dante and one analogue output, PoE powered, white
509161	TeamConnect Ceiling 2 BLACK	A beamforming ceiling array mic with two Dante and one analogue output, PoE powered, black
508620	SL CM VB	Ceiling Mic VESA Bracket
506846	SL CM FB	Ceiling fixing bracket for SL ceiling mic, for installing the microphone directly under the ceiling
508291	SL CM SK	Ceiling Mic Suspension Kit

**MobileConnect – assistive listening system employing BYOD (bring-your-own-device) concept.**  
 Listening support on your own smartphone. MobileConnect streams audio content live and in great quality via WLAN directly to the personal smartphone.

Item Number	Model	Description
508895	MobileConnect Station	MobileConnect Connect Station with (2) Dante Interfaces and PoE power supply
503167	GA 3	Rack adapter set for installing stationary ew G3 and G4 components in 19", black

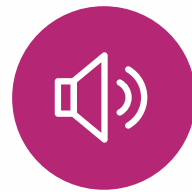

**SpeechLine Digital Wireless – microphone system specifically designed for speech and presentations.**  
 The SpeechLine Digital Wireless Microphone Series provides reliable and highly flexible solutions specifically tailored to education and corporate applications.

Item Number	Model	Description
508849	SL MCR 2 DW-3	SpeechLine Multi-Channel Receiver with 2 SL DW RF Links. Features Analogue output with (2) Dante Interfaces and PoE power supply
508854	SL MCR 4 DW-3	SpeechLine Multi-Channel Receiver with 4 SL DW RF Links. Features Analogue output with (2) Dante Interfaces and PoE power supply
509230	SL Bodypack - HM 1 KIT DW-3	SpeechLine Digital Wireless Bodypack kit. Includes (1) SL Bodypack DW and (1) SL Headmic 1 (omnidirectional, condenser)
509210	SL Bodypack - MKE 2 KIT DW-3	SpeechLine Digital Wireless Bodypack kit. Includes (1) SL Bodypack DW and (1) MKE 2 lavalier microphone (omnidirectional, condenser)
505885	SL HANDHELD 865 DW-3-EU	Handheld transmitter SL HANDHELD, includes BA 10, MME 865-1, digital, 1.9 GHz
506607	SL BOUNDARY 114-S DW-3 B	SpeechLine Digital Wireless conferencing microphone. Includes (1) SL Boundary 114-S DW and (1) BA 40 rechargeable battery
506612	L TABLESTAND 153-S DW-3 B	Table stand, wireless for MEG 14-40-L II, XLR5F, includes BA 40, USB cable, digital 1.9 GHz
506398	MEG 14-40-L II B	Gooseneck microphone, condenser, cardioid, 5-pin XLR-M, 12-48 V phantom, 1 articulating point, illuminated ring, 45cm long, black
506218	CHG 2 UK	2-way charger for BA10 and BA 30, includes power supply NT 12-4C
508986	CHG 2N UK	2-way charger for SL HANDHELD and SL BODY PACK, IPv4/6 network-compatible, includes powerpack
506801	CHG 4N UK	4-way charger for SL HANDHELD and SL BODY PACK, IPv4/6 network-compatible, includes powerpack

The above is an extract of Speechline DW family of products.  
 Contact your Midwich sales rep or send a request to [audio@midwich.com](mailto:audio@midwich.com) for further assistance with specifying and selecting your Sennheiser solutions.

# Introducing Professional Audio Solutions

**10%**  
global pro headsets  
CAGR, 2020-25<sup>1</sup>

**\$28.71bn**  
global audio  
equipment market  
revenue by 2025<sup>2</sup>

**124%**  
global pro  
microphone market  
growth, 2015-2024<sup>3</sup>

Anyone on the receiving end of a crackling Zoom or Teams call can tell you how important audio is when working remotely. With working from home here to stay in some shape or form, be it hybrid or otherwise, audio equipment has become the one of most important pieces of tech for a natural experience.

Schools and universities adopting hybrid or blended learning models must also make sure that the students tuning in have the same high standard of education as those physically present. If a screen goes blank - a lesson can continue. However, without quality audio, the whole thing collapses.

That is why professional audio suppliers have stepped up with a multitude of solutions to ensure everyone can hear each other well. Headsets, speakers and soundbars for remote working are still in high demand as workers find out the hard way that their laptop's built-in features often aren't sufficient. Sophisticated noise cancellation audio equipment has become essential for blocking out the background chatter.

In more formal venues, such as lecture theatres and large meeting rooms, the latest beamforming microphones, steerable loudspeakers, and echo-cancelling digital signal processes can transform messy noise into clearly targeted sound. Sophisticated audio set ups ensure that only intended sounds are received without other interruptions, providing smooth and easy communication and collaboration.

## Cloud

### Flexible digital control zone mixer for space-conscious installations

CLOUDDCM1 CLOUDDCM1E

Ideal for contractors/installers who require flexible routing of line & mic signals, the DCM1 is Cloud's first ever microprocessor controlled multi zoner.

### Discrete loudspeakers perfect for any environment

CLOUDCSC8W CLOUDCSC6W

Cloud's 6-inch in-ceiling speakers are perfect for any environment with, 2-way drivers that offer consistent dispersion across broad frequency ranges, magnetic speaker grilles available in black or white, accessible high-impedance or low impedance switch settings and removable logos.

### Compact 'fit and forget' amplifier

CLOUDMA80

The MA80 is a compact Mini Amplifier providing 80W mono output, designed for integration into commercial audio installations and AV systems. This "install and forget" component is small enough to be fitted into a wall or ceiling void, or directly adjacent to a projector, flat screen or loudspeaker.

### Cloud's value line for entry-level applications

Cloud Contractor series

A low-cost range of quality loudspeakers for flush in-ceiling installation. Ideal for background music and announcements in general public areas and buildings where good musical reproduction and high speech intelligibility are required.

## YAMAHA

### Bring clarity to your meeting with ultra-wideband audio and high-quality video

RVCS700AVEU

Equip your huddle room with best-in-class audio, video, and screen-sharing capabilities with this all-in-one video conferencing system.

### No wires and No limitations

RVHDEXEMICEU11

Amplify your voice, record lectures, and facilitate clear video conferencing with models specialized to your space. Their portable plug-and-play design, simple setup, and superior HD sound quality make them excellent options for a wide range of applications.

### Microphone system offering the ultimate in configuration flexibility and freedom

ELITEEXEC8

Designed to provide exceptional audio quality in the most demanding environments, the Executive Elite wireless microphone systems are suitable for high-end boardrooms, large auditoriums and more.

# Professional Audio

## SHURE®

### An elegant approach to conferencing audio

#### SHUMXA910W60C

The MXA910 eliminates all equipment clutter, leaving more room for clarity. With Steerable Coverage™ and onboard IntelliMix digital signal processing, you can capture every voice. Patent-pending Autofocus™ technology fine-tunes the audio pickup in real time, for consistent sound even if participants lean back or stand up.

### Designed for high-quality audio capture in premium AV conferencing environments

#### SHUMXA710W2FT

The MXA710 Linear Array Microphone represents the next evolution in Shure array microphone technology. The sleek, linear form factor of the MXA710 allows for placement virtually anywhere in a meeting space. Available in two lengths and three colors, the MXA710 includes proprietary Shure IntelliMix® DSP and Autofocus™ technology that provides all the processing needed for echo and noise-free conference audio.

### Ensure speech is captured accurately and reproduced intelligibly

#### SHUMXA310B

Organisational clarity takes focused discussion. But how can you conference effectively, if you can't be heard clearly on the call? The MXA310 maximises audio quality, so voice comes through clean — making purpose clear. With Steerable Coverage™ and a low profile design, it removes unnecessary clutter, giving you even more clarity.

### The IntelliMix P300 makes sound smarter, faster

#### SHUP300IMX

Don't let echo, noise or distortion take over the meeting. The IntelliMix® P300 enhances every aspect of conference audio. Combined with Microflex® Advance™ or Microflex® Wireless microphones, clean, clear sound reproduction and intelligent mixing keeps the agenda on track with clear communication.

# Specialist Audio Solutions

## Low-profile boundary layer microphone

The new CBL Series by AKG is a family of low-profile boundary layer microphones specifically for applications such as conference rooms and meeting spaces. Featuring intuitive user controls for talk/mute, elegant design aesthetics with LEDs, and screw terminals for mics and I/O, the CBL Series is easy to install, easy to use, easy on the eYes and makes meetings sound great.

## Affordable high performance install amplifiers

### CDI DriveCore series

The Crown CDi DriveCore Series is a cost-effective and energy-efficient install amplifier solution featuring high channel density, professional features and exceptional reliability. Ideal for powering HARMAN's JBL loudspeakers.

## The next generation of XLS amplifiers

### XLS series

With a sleek new look, larger LCD display, and more signal processing, the XLS DriveCore 2 Series offers high-performance and energy-efficient amplification for installation and portable live sound.

## Ethernet controller with 8 buttons for control

### EC wall controllers

The Soundweb Contrio EC-8BV is an Ethernet wall controller for use in Harman HiQnet systems. This can control and monitor parameters within BSS Audio Soundweb London and other HiQnet devices, including Crown DCi series amplifiers.

## Audio routing and signal processing

### BLU-50 / BLU-100

Offering affordable and easily installed audio routing and signal processing, the BSS Soundweb BLU-50 and BLU-100 fixed I/O devices offer audio transfer over HARMAN's BLU-Link fault tolerant digital bus using standard Cat5e cable.

## Blind-mount small format ceiling speakers

### Control 10 Series

Control 10 Series meets the increased demand for superior sound quality, installation-friendly features and value. They are ideal for applications where excellent sound quality is needed for medium volume music playback and paging. Control 10 feature wide bandwidth, wide coverage and combined 70/100V & 8 ohm operation in each speaker.

# Specialist Audio Solutions

## Outstanding intelligibility in high ceiling spaces

### Control 60 Series pendant speakers

Solving the challenge of delivering high quality, controlled audio in spaces with high ceilings, this range of JBL pendant speakers are available in multiple sizes to suit many applications from restaurants and bars, to education and retail spaces.

## Compact surface mount speakers

### Control 23-1, 25-1 & 28-1 surface mount speakers

These 3", 5" and 8" on-wall speakers feature rich sonic character, wide and consistent coverage, versatile mounting, and a contemporary yet discreet look. All models are also available in white.

## Compact in-ceiling speakers

### Control 24 & Control 26 ceiling speakers

The Control 24CT Micro and Control 26 are compact in-ceiling speakers, providing full high-quality sound for background music or announcement systems. They offer a discreet yet professional solution for a wide variety of applications, providing consistent dispersion and therefore even coverage throughout the space.

## Cost-effective, commercial-grade active soundbar

### PSB-1 Pro Soundbar

The JBL Pro SoundBar is an active soundbar designed specifically for commercial applications. It has an optimised feature set to address the unique requirements of hotel guest rooms, cruise ship staterooms and other commercial environments. Supporting both fixed and variable source volume and providing compatibility with fixed applications (where the volume is controlled at the soundbar) and variable applications (where gain is controlled at the television).

## JBL CBT Series column line-array loudspeakers

The JBL CBT range excels in offering exceptional - and affordable - solutions for reverberant spaces such as lecture theatres, concourses, houses of worship, transport hubs and any other tricky acoustic spaces where intelligibility would otherwise be an issue.

### CBT 50LA-1

## All-in-one portable rechargeable PA system

The EON One Pro is an all-in-one compact portable PA system featuring a built-in mixer and rechargeable battery. It delivers astonishing and powerful sound and is ideal as a utility PA in applications as diverse as corporate events to use in schools.

### EON One Pro

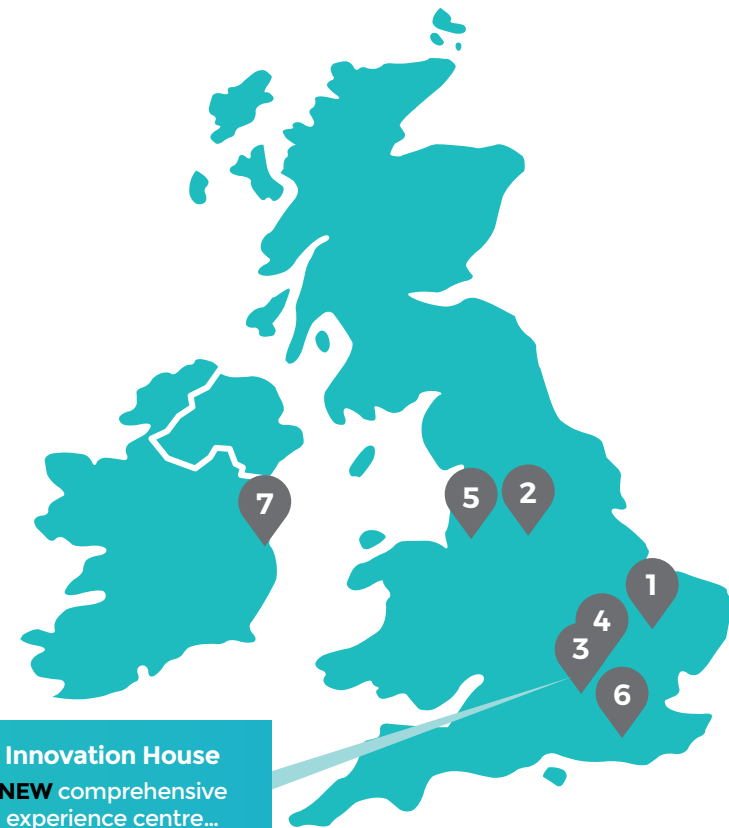

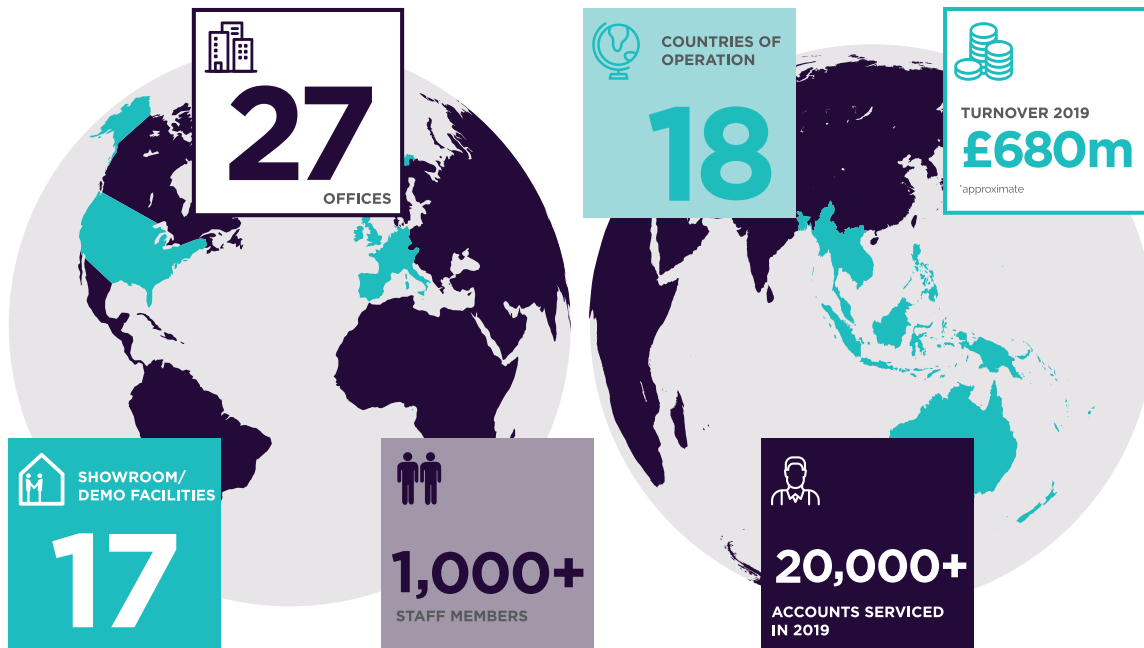

## All-in-one rechargeable personal PA

The EON ONE Compact packs a professional speaker, a full-featured 4-channel mixer and Bluetooth control into JBL's most compact battery-powered PA, weighing in at just 8kg. Presenters and fitness instructors will appreciate EON ONE Compact's ducking feature, which lowers background music volume anytime you speak to ensure your audience hears every word, loud and clear.

### EON One Compact

## Introducing Specialist Content Creation

During lockdown, millions of people were forced to study and work from home, relying on video cameras to either produce or receive information. From schoolteachers and university lecturers, to corporate executives and conference speakers, everyone is discovering the power of video to disseminate lessons, lectures, pep talks and presentations to anyone who is unable to attend in person.

The education sector has enjoyed the benefits of this advancing technology during the pandemic, but it will continue to be a key component in learning environments post-Covid. Lecture capture solutions are already popular in higher education, enabling lecturers to record, edit and publish online content. Recording can be pre-scheduled so it starts automatically and the finished content can be indexed and stored in a searchable video library.

The latest video cameras can act almost like a virtual cinematographer. PTZ (pan, tilt and zoom) camera features enable them to capture close-ups and longer shots of its subjects. Auto-tracking enables the camera to identify who is speaking and follow their movements to ensure they are always centre-frame. The newest models have flexible network technology such as IP streaming and multiple connectivity options such as HDMI and SDI.

Video and audio captured by these devices can be live streamed over platforms such as Zoom and Microsoft Teams. Content and information can be shared from touch screens and other smart devices and the output adjusted for different bandwidth and receiving technology.

# Professional Video Cameras

## Broadcast Quality 4K 10-Bit PTZ video camera with 12x optical zoom

### BD-P4K

"P4K offers a 1" Sony Exmor R CMOS back lit Sensor and 14.4 million effective pixels enable P4K to deliver stunning pictures in 4K resolutions with Full Bandwidth NDI. Excellent light sensitivity makes P4K perfect for all broadcast applications, sports, remote studios, newsrooms, house of worship and any shoot where quality matters.

## High quality, affordable PTZ camera

### DATA-PTC140NDI

The PTC-140 NDI is the first NDI camera launched by DataVideo, and supports simultaneous NDI® | HX, 3G-SDI, HDMI up to 1080P60 hardware output. Featuring 1/2.8 inch CMOS sensor, 1920x1080px Full HD resolution 20x optical zoom, 10x digital zoom gives you sharp images No matter where you mount the camera.

## Panasonic

## Mid-range, cutting-edge, wide-angle 4K PTZ camera

### PAN-AWUE100WEJ

The AW-UE100 integrated PTZ camera is the industry's first 4K/60p PTZ camera to support high-bandwidth NDI and Secure Reliable Transport (SRT). The new direct drive motor provides smoother pan and tilt movement, which is ideal for live remote and studio production.

## Broadcast studio camera

### PAN-AK-HC3900GSJ

The studio camera is designed for broadcasting, events and is equipped with a large sensor for high sensitivity and video quality. By combining with Camera Control Unit (CCU) and the Remote Operation Panel (ROP), it is possible to construct a long-distance optical Fiber transmission studio camera system at low cost.

## New generation handheld 4K camcorder with IP

### PAN-AGCX10

Packed into a compact body and offering the on-site mobility and portability, the CX10 enables high-quality 4K 50p recording. It offers wide-angle 25mm lens and 32x i.ZOOM, exclusive high-precision AF provides high-speed, accurate focusing for both 4K and Full-HD shooting. Perfect for reportage and interview style shooting, events coverage and sports.

## Versatile, compact, broadcast quality box camera

### PAN-DC-BGH1E

With today's increased demand for streaming in addition to traditional broadcasting, the LUMIX BGH1 provides a versatile solution in the form of an easy-to-use expandable camera that can be used in multi-camera, drone, IP remote control and live-streaming environments.

# Live Video Production & Streaming

**datavideo**  
www.datavideo.com

**Live switching, streaming,  
audio-mixing from a 4K source**

## DATA-KMU200

KMU-200 is an all-in-one solution for producing full HD virtual multi-camera video using a single 4K camera. KMU-200 uses a large touch screen for operation using similar gestures used on any tablet or phone. Use hardware control to precisely position the cutouts like a regular PTZ camera.

**4-Channel HD/SD HDBaseT portable  
video streaming studio**

## DATA-HS1600TMKII

The HS-1600T Mark II brings a new level of simplicity to production workflows. You'll set up faster and easier thanks to its portable "briefcase" design and HDBaseT Technology. With built-in H.264 web streaming encoder, you can stream to virtually any CDN like YouTube and Facebook in no time.

**epiphan video**

**The perfect-fit streamer  
and recorder - small size  
and big in capabilities**

## EPI-ESP1610

Pearl Nano offers the ultimate blend of portability and versatility with a refined yet robust feature set that includes ingestion, encoding, HDMI pass-through, and recording.

**Roland**  
Professional AV

**The new  
standard in  
hybrid event  
switching**

## V-160HD

Filled with pro features to take on any modern production, the V-160HD sets a new standard in hybrid event switching. Connect with live audiences in Full HD with comprehensive SDI and HDMI I/O and simultaneously stream to any popular web platform via USB-C.

**SONY**

**Capture every point of view with  
excellent 4K picture quality**

## SONY SRGX120WC

The versatile SRG-X120 remotely controlled PTZ camera is ideal for a wide range of applications - from classrooms and meeting spaces and medical environments.

**BirdDog**

**HD PTZ with Full NDI**

## BD-P200W

Designed for serious production the image quality of P200 is best in class. Built on a true Sony Image module with Sony CMOS backlit sensor, P200 has super fast focus, incredibly sharp images, and amazingly fast zoom.

# Lecture Capture

**Lumens**<sup>TM</sup>  
Brilliance by Design

## 4-channel recorder and encoder

### LUM-VSLC200

Lumens LC200 CaptureVision Station is an all-in-one media processor that allows users to mix, record, stream, and live-switch four video inputs. Ideal for lecture capture, conference recording and usability labs, it supports third party platforms including Kaltura, Panopto, OpenCast, YouTube, Twitter, Livestream and Wowza.

**epiphan video**

## Bring your video production studio with you

### EPI-PEARLM

This reliable and all-in-one video production system may be small but it's filled with endless pro-features. The Epiphan Pearl Mini takes your video production to the next level by recording, streaming and switching up to three Full HD video inputs from HDMI, SDI and USB sources. Stream to destinations over RTMP or RTMPS for greater security or share your webcast locally with popular protocols such as HTTP, HLS, FLV, ASF, UPnP and SAP.

**BirdDog**

## Remote control block camera based on unique NDI A/V transfer protocol

### BD-PF120

Featuring a Sony Exmor R™ back-illuminated CMOS image sensor, PF120 delivers incredible imaging characteristics, with enhanced low noise sensitivity. BirdDog's unique NDI silicon produces visually lossless, full-bandwidth NDI and the USB 2.0 UVC output connects directly to video conferencing platforms.

**Panasonic**

## Compact professional 4K POV PTZ camera

### PAN-AWUE4W

The AW-UE4 supports 4K video output and is equipped with an ultra-wide-angle lens, with a 111-degree field of view. The compact size and versatility of the UE4 body, makes this the perfect remote camera for recording or streaming. A single ethernet or USB power cable can transmit, control and power the camera, making usage easier.

**Lumens**<sup>TM</sup>  
Brilliance by Design

## Auto tracking and smart switching HD PTZ

### LUM-VCTR1

VC-TR1 is a fully integrated auto-tracking PTZ camera. It is designed to automate lecture capture, corporate training, house of worship, and any stage-based production. Lumens VC-TR1 camera is capable of automatic and continuous tracking. It is an all-in-one unit with No need for dongles, add-on tracking hardware or an external processor. Equipped with dual cameras – a PTZ camera and a secondary panoramic camera - VC-TR1 guarantees consistent tracking performance every time, even in low light conditions.

**SONY**

## Compact 4K 60p BOX-style remote camera with 25x optical zoom

### SRG-XB25W

The SRG-XB25 high-zoom BOX camera draws on decades of Sony's professional imaging know-how to suit a wide range of content creation applications. It's ideal for capturing and streaming impressive 4K pictures in environments including seminar rooms, lecture theatres, and more.

## Introducing Mounts & Accessories

As the AV industry grows, having the right mounts and accessories to go with them becomes increasingly important. With new innovations in the mounts industry, small to large displays, televisions, projectors and audio equipment are able to be seamlessly integrated into their environment.

Workplaces are also calling for improvements in the ergonomics of their technology. From height adjustable monitor arms to the popular sit-stand workstation, improving employee wellbeing has been shown to drastically increase productivity rates.

Universal mounting systems can support a wide range of equipment such as flat panels and video walls. With heightened demand of technology in the workplace, having the right cable solutions allow for faster data transfer, clarity of images, and sounds and flexibility.

Custom wall plate spacers and micro-adjustability features can significantly speed up the installation of a video wall and reduce the installer's bill. If a panel needs to be replaced, quick-release and hot-swapping capabilities enable this to be done quickly and safely to avoid interruption of service.

When it comes to projection, it pays to invest in the right accessories for the job. This will include a fixed, portable or even motorised screen. With a higher quality screen, such as a model that reflects ambient light and increases contrast, you may need a less powerful, and therefore less expensive, projector to accompany it.

**30-40%**

## Easily rotate from landscape to portrait and back

The tool-less rotation adjustment allows the users to freely rotate the screen from 0° to 90° while mounted or locked at a preferred angle using the built in angle guide before mounting.

**BTEBT7550**

## Heavy duty stylish flat screen wall mount

Designed to mount screens close to the wall, the stand bolts to the floor with a minimal footprint and features integrated cable management to ensure a smart and stylish installation which is in keeping with the high-end, contemporary aesthetic.

**BTEBT8701**

## Designed to make videowall installations as quick and simple as possible

The BT8310 features a pop-in, pop-out system which enables quick and easy access to the rear of mounted screens for servicing and maintenance and 8 point micro-adjustment.

**BTEBT8310B**

## VIDEO WALL MOUNTS

Peerless-AV understands the challenges facing installers and integrators and our experience in the market has led to the creation of video wall mounts that are packed with innovative features that offer up to a 60% reduction in installation time.

## Sleek design, compatible with any office decor

Thanks to technology advancements and the increased cost of travel, video conferencing is quickly becoming a commonplace in business around the globe. Peerless-AV's floor to wall solution makes implementation of video conferencing equipment that much easier.

PEERVCM580

## Ideal for collaboration spaces

Mobility, appealing design, display height adjustment and a pre-assembled base ensure quick assembly, while providing a rigid, but attractive structure to match the display's aesthetics. The 4" casters make it easy to move from room-to-room and optional bumper accessories ensure nothing is damaged along the way. The mount's rotational interface allows the user to easily rotate the display 90° from landscape to portrait, and holds the display at a 0° or -4.5° to further promote ergonomics with a more natural angled writing surface. Designed to be used with Samsung Flip 55" & 65" displays to encourage collaboration.

PEERSR560FLIP2

## Universal outdoor digital menu boards for QSR and retail drive-thru

The sleek Outdoor Digital Menu Board models can support up to three displays to enhance outdoor drive-thru efficiency. These all-weather rated, outdoor units are UL 48 certified and offer a low operating cost, modular design, and a simplified two-man installation process. Universal design offers maximum flexibility and compatibility with leading 55" outdoor digital signage displays from Peerless-AV, Samsung and LG.

PEERKOF5552EUK

Designed and manufactured in the United Kingdom, PMVmounts products are designed with compatibility and ease of use in mind with an emphasis on build quality and competitive pricing. Manufactured using state-of-the-art CNC fabrication technology all PMVmounts products are backed up by the PMVguarantee on fitment and with a lifetime warranty on materials and workmanship. PMVmounts welcomes custom project enquiries.

## Customisable to meet individual requirements

Whether you need full vinyl wraps, a different colour or another customisable feature, we can make sure this single sided kiosk meets your requirements.

PMVKIOSKXLIS

## Designed specifically for landscape screens up to 100"

Fitting screens from 65" to 100", this trolley can hold up to 135kg. With a strong and sturdy frame, this mount is quick and simple to assemble and allows screens to tilt up to 16°. Perfect for use with SMART Interactive displays.

PMVTROLLEYXXLW

## Smooth & quiet electric height adjustment

Fitting screens from 43" to 86", the Electric Height Adjustment TV trolley has near-silent movement and features anti-crush technology. Ideal for interactive displays.

## Enjoy new features such as Centreless shift and ControlZone leveling adjustment

Chief upgraded their fixed wall mounts based on installer feedback and the new benefits Now include added stability, faster install, improved lateral shift, easier cable management and enhanced security.

CHIEFLSMIU

## Eliminate the need for wall inspections

The Tempo™ Flat Panel Floor Support System uses the floor instead of the wall to support displays. Customise the bottom panel to match existing decor and create an aesthetic solution for any environment.

CHIEFAVSFSS

## Support the devices and components that accompany displays

This component storage panel supports devices and components near displays – either on-wall or attached to Fusion mount extrusions. Slide-out feature improves ease of access to components.

CHIEFCSSMP15X10

### Modern single column design

Suitable for screens up to 84" and 130kg, this single column trolley range is free standing with electric or fixed height options.

8420/8425/8430/  
8421/8426/8431

### Stylish design enables total user inclusivity

Designed specifically for ease of access for users of all heights and wheelchairs, the TV lift ensures interaction is safe and easy.

8960/8964/8996/  
8961/8997/8990

### Lightweight and highly mobile iPad & tablet PC management solution

This range is able to store between 15 and 32 tablets in its compartments. They will simultaneously charge and sync a wide range of devices all at once.

7425/7430/7431/7432/  
7455/7470/7471/7472

### Keep your devices charged and secure

With 8, 15 and 16 bay options, the Ibank range can be desk or wall mounted and is suitable for either 7" or 10" devices.

7705/7707/7708/7725/  
7730/7731/7732

### Effortless high-low adjustment

The BalanceBox® 400 is the perfect solution to move your touch screen up and down. The BalanceBox® 400 has a weight capacity up to 90 kg (198 lbs) and a compact design with a stylish stainless steel cover that is hidden behind the screen.

BALBOX400

### Perfect for extra-large interactive flatpanels

The BalanceBox® 650 has a weight capacity up to 65 kg and a compact design with a stylish stainless steel cover that is hidden behind the screen.

BALBOX650

# Value Added Services

## Do you want to issue quotes faster?

With 'My Quotes' you can get and edit quotes – quickly adding your brand and pricing – before sending it on to your customers.

## Want to get more out of a product? Our brand specialists can help

Office Fox Ltd. has more than 50 sales specialists who can help you find exactly the right product for your customers.

## Need product details for your system or website?

Using a data feed, we can automatically provide up-to-date product specifications, images and pricing, so your customers get the information they need. We also offer order and delivery reports.

## Do you want a faster online ordering service?

Open Online allows you and authorised staff to order online using your credit account.

## Do your customers have exacting requirements?

Find them the products they want refining your search in our store. Filter by brightness, screen size, resolution and more.

## Can we help you with cash flow?

Our credit professionals can assist you with credit checks and advice, fraud prevention, and other financial services. We can discuss supporting you in financing the project, offering 30-day interest-free credit if needed.

We can't guarantee that you won't see another bad debt, but we can empower you with up-to-date information to aid your decision making. Contact your Account Manager to find out more.

## Already have a credit account? We accept payment through:

- **Electronic transfer into our HSBC account**
- **Cheque**
- **Direct Debit**
- **Payment can also be made over the phone by debit or credit card. A 1.5% plus VAT surcharge is applied to all corporate credit card payments.**

## Sales

### How do I arrange a trading account?

You can either use our online credit application form or call our sales team and request a credit application form. Subject to status we can often provide up to £5000 credit the same day.

### How do I arrange an external visit?

Please speak to your Account Manager who will be happy to advise you.

### What is the latest time I can place an order for next day delivery?

Our sales and credit teams are manned until 6pm, Monday to Friday. We are able (subject to stock availability and credit status) to despatch the orders that you place with us up until this time for delivery on the next working day.
